**B**rad G. Moore is president of APi CAD Services, a Wisconsin based company that creates coordinated and functional 3D blueprints for industrial and specialty construction companies.

Moore is a licensed master plumber in the state of Wisconsin. He began his local #75 union plumbing apprenticeship in 1997 for the Grunau Co., a fire protection and mechanical subcontractor headquartered in Oak Creek, Wis.

After several years as a foreman, Moore came out of the field and into the office to become a mechanical systems coordinator in 2004. Moore spent the next three years as the lead coordinator on piping and plumbing projects for Grunau. In 2007, he was promoted to mechanical coordination manager and was responsible for the company's entire coordination efforts.

Moore's passion for Building Information Modeling (BIM) and his desire to focus only on BIM initiatives led Moore to leave a mutually beneficial career with Grunau in 2008 to form Premier CAD Services, LLC.

After a successful 13-month-run as an independent outsource company, Moore was presented with an opportunity to continue his efforts as a subsidiary of APi Group Inc. APi Group is a parent company to more than 33 independent fire protection, and industrial and specialty construction businesses located throughout North America and the United Kingdom. In September 2009, APi CAD Services was established as a division of an APi Group existing company, APi Facilities Management.

Moore is recognized throughout the industry as a leader in the application of BIM technology for industrial and specialty construction. In 2009, he was a featured speaker at a BIM symposium for the National Institute of Constructors on the benefits of BIM to the MEP contractor. He is a member of the Building SMART Alliance, a group created to address the profound changes coming to the U.S. construction industry. The alliance will develop and promote methods and standards that are more efficient to gather, maintain and communicate technical information related to facility and infrastructure lifecycles.

Moore holds the following credentials: State of Wisconsin Master Plumbers License, Medical Gas Installation Certification, and Competent Person for Excavating and Trenching.

Moore enjoys spending time with his wife and three children at their home in Raymond, Wis. ☪
